Middle Range Theories: Application To Nursing Research (Peterson, Middle Range Theories)

Synopsis

The most complete and detailed book devoted to middle range theories, this text examines theories and their applications in clinical nursing research and practice. The authors provide expert advice on selecting an appropriate theory for a nursing research project and on critiquing theories. The most frequently cited middle range nursing theories are explored in individual chapters. Each theory chapter includes examples of the theory's use in research, sample application of the theory, analysis exercises, and critical thinking exercises. The Third Edition includes new chapters on Attachment theory and the Shuler Nurse Practitioner Practice Model.

Customer Reviews

While a book on any theory for nursing would put me in a coma, this one really does. I don't know why academicians feel a need to use 45 words to say something that could be said in 10.

Additionally, most of the time, I have to go back and reread sentences over because they are so convoluted and sound like the authors spent weeks in a thesaurus. Truly intelligent people can break down complex concepts into very understandable explanations. These authors don't fit in that category of intelligence!

Perfect like new im very happy

It was nice to be able to rent a text book. Sometimes we may only open or use very expensive texts books a couple of times. Then when it is time to re-sale, you may get 1/4 of what you paid for it back. I loved that I was able to get it immediately on my kindle, as I forgot to get this one! Will certainly be using this option more often!

I had to get this for nursing school. Very cerebral and hard to understand. i will not be keeping this as part of my library.

As described.

This is a required textbook for a class. Most of it is clearly written. Good theory book but outside application in practice will be limited to none unless you are doing research.

When I received the book, the entire cover was off the book.

I wish they include more theories related to health promotion and prevention for other specialty nurses. only one chapter is applicable to my specialty
