I am using this with my classroom of children ages 18 months - 36 months. It is very easy for me and easy to teach. The children are learning at a fast pace. Love it!

Grandbaby just clearly signed "milk" at 9 months! We're on our way.

Easy to read and understand. Good practical exercises and suggestions. Has structure to be good reference book. Excellent tips to help remember.

Just what I hoped it would be. Clear direction and pictures to assist.

Very important information for all new parents. This book is laid out in an easy-to-understand format with all important words included. I would highly recommend this edition to any parents, new or experienced.

My 14 month-old daughter loves it. She loves looking at the book. And she will ask me to tell her what it is while pointing to the pictures :). Highly recommend it.

I bought this for my daughter to teach her one year old son sign language. He doesn't have a hearing impairment but one year olds have difficulty communicating til their verbal skills develop. She said it's already started to help them communicate with eachother. Only a couple of days and he was signing for a drink or more when he liked something he was eating.

Using this resource, we've taught our great grandson many signs to use before he is ready to speak. We appreciate being able to understand his wants and needs. It's amazing how quickly he has learned to sign.
