Healing Our World: Inside Doctors Without Borders

Synopsis

When children are caught in civil wars, when earthquakes destroy homes and villages, when AIDS and other diseases shatter families and communities - the volunteers of Doctors Without Borders are there. Their mission is simple - to bring life-saving care to the world's neediest people and to speak out when the rights of the people in their care are abused or violated. Médecins Sans Frontières, known in English as Doctors Without Borders and by its volunteers as MSF, is the world's largest independent medical humanitarian relief organization. Every year, more than 3,000 MSF volunteers and 12,000 local men and women bring medical aid to people in more than 70 countries. In *Healing Our World*, David Morley presents his own story and the stories of other MSFers who have volunteered in some of the most dangerous and forgotten corners of the world - the Congo, El Salvador, Chechnya, Bangladesh, Mozambique, Afghanistan, southern Africa. These are stories about healing and helping people, about making the world a better place - stories filled with sorrow and hope, anger and idealism, determination and passion. *Healing Our World* includes information about MSF's history, how it selects its volunteers and decides where to send them. Includes photographs from the field.

Book Information

Paperback: 64 pages

Publisher: Fitzhenry and Whiteside; 1 edition (May 5, 2008)

Language: English

ISBN-10: 1554550505

ISBN-13: 978-1554550500

Customer Reviews

Starred Review. Grade 6 Up "This is an excellent, timely, and relevant account of the work of Médecins Sans Frontières/Doctors Without Borders by the executive director of MSF Canada from 1998 to 2005. Part one covers general information about the organization. Part two consists of journal entries giving personal, detailed, and dated accounts that summarize the group's work. It

includes 2001 efforts to recover victims of an earthquake in El Salvador, 2004 medical care in the war-torn Congo, and 2005 treatment of the AIDS epidemic in Zambia. The easy-to-read text is accompanied by black-and-white photos that show the humanity and the intense severity of the conditions described. This fascinating volume will introduce readers to a dedicated organization that gives people who live in forgotten places evidence that someone actually cares.â “Debbie Stewart Hoskins, Grand Rapids Public Library, MI Copyright Â© Reed Business Information, a division of Reed Elsevier Inc. Morley is a former executive director of the Canadian section of Doctors Without Borders, a humanitarian organization known throughout most of world as Medecins Sans Frontieres (MSF). With clarity and passion, he introduces the organization's history, charter, and current efforts to provide health care where it is needed most. The balanced survey, illustrated with grainy black-and-white photos, presents alarming statistics (one billion people live without clean drinking water; two million young people between the ages of 15 and 24 are infected with HIV) while guiding readers away from paralyzing despair: "It is easy to feel hopeless when images of human tragedy fill the TV screen. . . . When you look closer, the picture changes. You see people caring for each other . . . and helping, not just destroying." Profiles of MSF volunteers and excerpts from Morley's own field journals round out this intimate, concise, well-written overview that may appeal to adults considering volunteer stints as well as young people thinking about future possibilities. Informative and quick, like a short meal with protein.
