Synopsis

The Secret About How to Learn The Best Way is Finally Revealed! **Get the book today and get a FREE bonus inside!**It is no secret that we would all like to know everything we can in this world. Whether we want to or not, we spend our days picking up on various bits and pieces of knowledge that we didn't necessarily intend to learn. While that is all well and good, there is still more to the story, and we should strive to learn more intentionally and less passively. No matter what you are doing in your day, odds are if you even half listen to the radio or television, you are going to learn something. This book is going to challenge you to take your learning to a new level, however, and learn to view life like a genius. Don't go through life with that sort of half-hearted learning anymore, but become hungry for knowledge. It doesn't matter where you are in life, what you are doing with your day, or what you intend to do with your future. You need to make the most out of your situation right now, whatever that situation may be, and you need to make yourself better. There is nothing wrong with what you are doing right now, but what you need to learn is how to grow. Make a deliberate effort to expand your knowledge. Don't know how? Well, you have come to the right place. This book is designed to teach you how to learn. You will learn how to learn, and when you know that, the world becomes an open book. By the time you have reached the end of this book, you will have learned: The art of learning Thinking like a genius How to develop your own learning style How to be a one-of-a-kind learner How to keep the genius mindset And much more! Customer Reviews

I bought this thinking it was a book, it is not. I would agree with another reviewer who said it was more like a "pamphlet." I thought it would be interesting since I am passionate about learning. All that this book is is a quick pep talk on how you can be a genius if you really believe in yourself, and an explanation on how to speed read. What a rip off... Spend your money elsewhere. I wish would have a real book filter to protect buyers from "books" like these. Do not purchase.

I'm finding these days that I need to grab every available advantage to keep up with technology and keep my online business growing! This book is certainly going to help with that. Really liked the section on speed reading, this is going to help when researching new products or even just trawling through forums, sometimes you need to skim through the text (effectively!) before going back to the most relevant discussions or points. Retention is another area that as we age, becomes a bit more of a challenge! There's some great tips in here about the 'art of retention' and this is certainly going to come in handy for me. Great work from an author whom knows what they're talking about, recommended read.

They say, "you can't teach old dogs new tricks anymore." Not that I consider myself that old but I have to admit learning has become more difficult as I've grown older. I've always admired the great geniuses like Einstein and Gates and have wondered what was running in their minds. I imagine their brains are like giant sponges just absorbing everything they focus on. I grabbed this book hoping to learn something new. It mentions a lot of things like the mindset of a genius, speed reading and retention, etc. But what struck me the most is step 5 of 5 which is commit to spend 20 hours on learning something. It actually makes sense. I don't expect to learn violin after taking just one class. I have to commit my time in order to learn how to play and give more hours to become an

expert.

I loved this book. If someone needs a quality book for personal development this is the appropriate. I found very interesting the chapter 8 with five steps for success and in general all information which included here are useful and educational. Good Choice!

I like his perspective on learning styles. There are thousands of ways to learn and no one way is correct. You have to discover your learning style by experimenting. Like he says in the book „no one can tell you what your learning style is.“ I picked up on his tip for reading 3 words at a time right away and tried it for the last two chapters. I was surprised that I was still able to retain what I was reading while using this speed reading tip. I „cm already a faster reader! I don't know if it will make me a Genius but it already made me a little smarter.

This book was easy to read and can be finished in less than 30 minutes. Overall, the book is more like an overview of the different components of a Genius. Not so much into the how. However, it does good job laying out the components.

I loved reading this book. There was a lot of helpful info on how to speed read, how to find your words per minut and how to be a better learner. If you want to be able to learn more efficiently then check out this book!

This is a must read book for anyone and everyone. It gives you various tips and methods to speed up your learning process and thus make you feel like a genius. Genius is indeed a heavy word and is usually correlated with natural talents but this book will make you feel otherwise because it helps everyone and the word genius is used in a vague sense. Some of the techniques in the book were very useful to me like speed reading. Overall, I highly recommend this book.
