Investment Banking Workbook

Synopsis

Investment Banking WORKBOOK is the ideal complement to Investment Banking, Valuation, Leveraged Buyouts, and Mergers & Acquisitions, 2nd Edition, enabling you to truly master and refine the core skills at the center of the world of finance. This comprehensive study guide provides an invaluable opportunity to explore your understanding of the strategies and techniques covered in the main text, before putting them to work in real-world situations. The WORKBOOK--which parallels the main book chapter by chapter--contains over 400 problem-solving exercises and multiple-choice questions. Topics reviewed include:

- Valuation and its various forms of analysis, including comparable companies, precedent transactions and discounted cash flow analysis
- Leveraged buyouts--from the fundamentals of LBO economics and structure to detailed modeling and valuation
- M&A sell-side tools and techniques, including an overview of an organized M&A sale process
- M&A buy-side strategy and analysis, including a comprehensive merger consequences analysis that includes accretion/(dilution) and balance sheet effects

The lessons found within will help you successfully navigate the dynamic world of investment banking and professional investing. Investment Banking WORKBOOK will enable you to take your learning to the next level in terms of understanding and applying the critical financial tools necessary to be an effective finance professional.

Investment Banking FOCUS NOTES is available for purchase for further self-study

Joshua Rosenbaum is a Managing Director at UBS Investment Bank in the Global Industrial Group. He originates, structures, and advises on M&A, corporate finance, and capital markets transactions. Previously, he worked at the International Finance Corporation, the direct investment division of the World Bank. He received his AB from Harvard and his MBA with Baker Scholar honors from Harvard Business School. Joshua Pearl is an investment analyst at Brahman Capital Corp. Previously, he structured and executed leveraged loan and high yield bond financings, as well as leveraged buyouts and restructurings as a Director at UBS Investment Bank in Leveraged Finance. Prior to UBS, he worked at Moelis & Company and Deutsche Bank. He received his BS in Business from Indiana University's Kelley School of Business.

A much perfect aid to consolidate all knowledge conveyed by the main book, this 'assistant' issue will certainly help you to get familiar with practical matters in the area, offering a rich opportunity to learn through fully concrete applications.

Without these additional exercises, you will not benefit 100% from the Joshuas IB book.

on time and as advertised

Perfect.

Excellent

This book is ok. There are so many math errors on it. Answers are always off. More in depth review. 3 simple errors. [...] c. states answer is 209.4 million from $4127.8 \text{ millions} \times 5.1\%$ I am assuming $5.1\% = .051$ (I hope) so $4127.8 \times .051 = 210.5178$. Not 209.4. f. $3931.3 \times 8\% = 314.504$ not 313.4. g. same things. There are plenty more errors, that makes everything really confusing, especially when you are using previous answers as variables for the next question, and the next question (like problem d. 560 ... 217.8 are wrong.) Soon, #'s are just so far off. Even when you use the books' answers for future questions its still wrong. Its ridiculous. Aside from that, I like the book, I am learning and the differences between my answers and the ones from the book, makes me think a little more. BUT It is very frustrating especially since I consider myself new to finance, and I want a definite answer to help me know I am doing things correctly not a stupid $\$ \# \text{ @ } \$ \# \text{ @ } \$ \# \text{ @ } \$ \# \text{ @ } \$ \#$ number.

Hard to use unless you get the whole package that includes the CDs for models and the workbook. But overall, a great outline for all the valuation concepts. A bit repetitive for people coming from a strong accounting background.

Good book used to supplement the textbook. Each chapter has open-ended problems, multiple-choice and short answer.
