If you have been on other types of diets before and have struggled to shed those pounds or even boost your energy levels, the Ketogenic diet will help you immensely. So what is a Ketogenic diet? It is simply a diet where a person consumes foods that provide them with more fat, and very few carbs and proteins. In a Ketogenic diet, you get up to 90% of your calories in form of fats, with the rest being split between the other two macronutrients. The Ketogenic diet is aimed at causing a shift in the body's utilization away from glucose to fats. In other words, you are causing your body to burn fats rather than what it is normally used to – sugars. During this process, your liver produces substances known as ketone bodies. The recipes that have been provided in this book are ketogenic diet friendly. These recipes are not only easy to cook but taste wonderful too. All that you will need to do is get the necessary ingredients and keep them on hand. If you plan ahead and pre-decide your meals, following the keto diet won't be difficult. It would be quite simple. You will need to stay strong and resist temptation. Be patient and you will definitely notice positive results in no time. "Health is the Ultimate Wealth" Any investment made towards bettering your health conditions is going to pay off so much more in return, so don't hold back. This will be the best investment for you've ever made, that's my guarantee.
