Customer Reviews

I wish I had this book when I was applying for colleges over a decade ago. Instead, I'll settle on recommending it to my high school age siblings! The outline format gives you a clear, step by step approach to putting yourself in the best position possible. The notes on timing for the different activities are also really helpful. When there is so much you can't control about the college

application process, it's good to know some of the things you may be able to control!

Applying to college is such a stressful time for both the student and the parent. It can be overwhelming and full of fears of making the wrong choices and where to begin with it all. This book is such a great tool. It makes the process digestible and seem do-able. Ms. Schildhorn has this way of organizing and walking you through to help you see the light at the end of the tunnel. Would recommend this book to any parent (or student) of a high schooler . In a sea of college application books, it's at the top of the pile for sure!

With a Junior and a Senior in high school I was desperately looking for some advice on how to help my kids get into the schools of their dreams and how to hopefully get them some money too! This book was exactly what I was looking for! Simple and easy to digest, this "manual" showed me how to help them to put their best foot forward! Love that the language was written for the "layman", and I really liked the insider tips/secrets! Buy this book!!!! You will not regret it!!!!

This book really helped me. It's written like an outline, so it is very easy to follow. The guide tells you the 12 things that matter the most in the admissions process and then gives you each step that you need to follow to help you get admitted. I honestly had no idea where to even start but this book listed exactly what I needed to do and when I needed to do it. Every high school student needs this book.
