## **Customer Reviews**

I bought these flashcards to help me study for my AP Psych class tests as well as the AP exam. They were extremely helpful and definitely helped me prepare for the tests. The cards are sorted by category, so if you have a chapter test, you can choose to focus on a single subject. They cover nearly every term and are easy to use. They are very descriptive, which is mostly nice, but at some points, the definitions seemed a little superfluous. Also, the answer for the term sometimes was a part of the card's definition, so studying the definition and guessing the answer was not always effective. The flashcards themselves are made from good material. They aren't easily folded or ruined. Overall, I recommend that you buy these flashcards if you are taking AP Psych. Making your

own flashcards requires a lot of time and can easily become a major pain! Except for a few minor quirks, they are a very effective, efficient resource.

Just changed my major to psychology and I had read a review that said these were a must for college psych major so I bought them. They are GREAT! They're broken down into categories: cognitive, social, biological, etc. and the words in each category really do hit the main points. I was hoping it would help me study for the GRE but it's even helping me with my finals.

My brother used these to study for the AP Psych test and paired the flash cards with the Barron's AP Psych prep book. He got a 5/5 for the AP Psych test and told me these worked great. I saw him studying these around the house and I picked them up to help him study and when I read the cards I found out that they were pretty packed with good information. If you like using flash cards to study then the Barron's AP flash cards are a good buy!

These cards got me through AP Psych!! I love these cards. They make it so much easier than making your own flashcards. The best few things about this purchase have been; The price is phenomenal. There are all of the flashcards for many terms. The included ring makes studying and keeping track of the cards a breeze. The case they come in is very protective. One thing I would recommend doing is putting in small dividers for each section/unit to make it easier to group cards.

I love these flashcards. They're a great timesaver, and very effective. Easy to read, concise yet thorough, and - which is very important in the vast and interconnected discipline of psychology - relate the current topic to those of past and future flashcards. They're nicely labeled, bulleted, and pre-punched for hanging on the provided ring. I've been using these flashcards since I started taking my high school AP Psychology class, and I have a solid A and well understand the class material. I feel confident that these cards are helping me do well.

THERE ARE SO MANY FLASHCARDS!! I was super excited when this arrived and I was very surprised by the amount of information on each flashcard. & the ring to hold a set together is a nice touch too! This helped me prepare for my ap exam and help me pass with flying colors. Would recommend for EVERY ap psych student!!

Was helpful in studying for the AP test. What I did not like was all the information on the cards. It

was nice to have all that information, but it was too much when you wanted a summary.

While this may be a good review for many core concepts, a lot of the cards are a bit pointless, and contradictory. For example, there are cards that sound like they describe a precise condition or term, but puts a very broad category as the answer. For example, at least one of the cards did something like describing what seemed like Alzheimers disease, but the answer was mental illness. Some of the cards seem hastily done, and it feels like they were just trying to fill the box with random cards.
