World Physical [Laminated] (National Geographic Reference Map)

Synopsis

National Geographic's The Physical World map highlights the Earth's land and undersea forms with exquisite hand-painted relief. Drawn in the Winkel Tripel projection, distortions are minimized and unlike many other World maps, Greenland is shown the same size as Argentina and not as the size of all of South America. Two corner inset maps show the Earth's crust and world climatic zones. The map is encapsulated in heavy-duty 1.6 mil laminate which makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:35,842,000 Sheet Size = 45.75" x 30.5"

Book Information

Series: National Geographic Reference Map

Map: 1 pages

Publisher: National Geographic Maps; 2014 edition (January 8, 2016)

Language: English

ISBN-10: 0792250001

ISBN-13: 978-0792250005

Product Dimensions: 3.2 x 3.2 x 37.5 inches

Shipping Weight: 7.2 ounces (View shipping rates and policies)

Average Customer Review: 3.9 out of 5 stars 6 customer reviews

Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

The map itself is nice, though more detail & labeling would be nice. The fact that it is laminated makes it nice and durable, however the map I received had creases in it. Presumably the creases were in the paper map before it was laminated as I cannot remove the creases with light heat. I

expect a higher quality product from National Geographic. If I weren't working on a time sensitive project I would have returned it and gotten a replacement.

This is a really nice map. It looks great on my wall and is sturdy. I love being able to show different landmarks to my kids whenever the opportunity comes up. I love being to show them where countries are when we study about them, or volcanoes, or other geologic info (plates, etc...)

Nice but way smaller than I thought.

This map is exactly what it claims to be. I am very happy with it and enjoy looking at it.

I put the map on the wall in our family room (in place of two historical downtown Baltimore photo's) everyone who comes into the room goes to the map and is amazed at the mountains and ridges etc. on the ocean floor. It has generated alot of discussion among the old 80's and the young teens who had never seen a map like this. I wish it also showed the fault lines etc. that lie beneath the earth and ocean surface.

It's an awesome product! Tried it immediately after I received it. The package is so pretty as well! These are so great! good product with high quality. OK. for my best friend,
