Discussion Of Cold Damage (Shang Han Lun): Commentaries And Clinical Applications

Synopsis

A major new translation of the Chinese classic Shang Han Lun by scholar and medical doctor Guohui Liu makes this foundational text fully accessible to English speaking clinicians for the first time. Extensive study and research underpins the translation; the author's understanding of both classical and modern Chinese enables him to interpret fully the ancient work within the theory of Chinese medicine. An extensive commentary explains the translation, the difficulties with the text, how it has been subsequently translated and expands on the theory laid out in the original text to reach an understanding that can be applied in the clinic for diagnosis and treatment. The value of this classic text lies primarily in its establishment of a basic framework for differentiation and treatment, but it also presents 112 formulas and 88 medicinal substances, which are commonly applied in clinical work for various conditions. In this edition, the 112 formulas are fully explained in the context of the clinical experiences of well-known ancient and modern doctors, and they are also laid out in two appendices, cross referenced to the text.

The best English explanation of this important work.

beautiful book

This book is really awesome! The author gives a deep insight of his knowledge. Very profound discussions about different authors from later periods of the shang han lun, very professional discussion on that topic, that is not influenced by the authors own interpretation. This discussion type text is exactly the way we have to reconstruct old texts of Chinese medicine!
