DEWALT Electrical Licensing Exam Guide: Based On The NEC 2017 (DEWALT Series)

Synopsis

For years, students have turned to the DEWALT ELECTRICAL LICENSING EXAM GUIDE to prepare for professional licensing exams. Combining vital knowledge and valuable test-taking strategies, this trusted text features comprehensive coverage to help you pass your state and local electrical licensing exams. Now updated to reflect the 2017 National Electrical Code, the new edition covers Journeyman, Master, Maintenance, Residential, and Sign licensing exams. Rather than focusing coverage on specific state requirements, the author presents content from a national perspective to make the material useful no matter where you plan to seek licensure. With a proven approach to exam preparation, helpful study aids, test-taking tips, detailed examination regulations, formulas and references, and realistic sample exams with over 500 practice questions, this valuable text helps you learn what to expect from licensing exams--and effective techniques for passing them.

Ray Holder has worked in the electrical industry for more than 50 years as an apprentice, journeyman, master, field engineer, estimator, business manager, contractor, inspector, consultant, author, and instructor. He is a graduate of Texas State University and holds a Bachelor of Science degree in occupational education. A certified instructor of electrical trades, he has been awarded a

lifetime teaching certificate from the Texas Education Agency in the field of vocational education. Mr. Holder has taught thousands of students at the University of Texas; Austin Community College; Odessa College; Technical-Vocational Institute of Albuquerque, New Mexico; Howard College at San Angelo, Texas; and in the public school systems in Fort Worth and San Antonio, Texas. He is currently the director of education for Electrical Seminars, Inc. Mr. Holder is a past member of the National Fire Protection Association and International Association of Electrical Inspectors, and a retired member of the International Brotherhood of Electrical Workers.

I had hoped it was more than just practice exams

great book

There are 6 25 question journeyman electrician tests and 6 25 question master, plus final exam for each with 100 questions. Book also has other tests and exams for some maintenance and residential electricians. For whatever reason the time you need to complete the test in this book and actual time at the state exam are different (almost seems like a typo). Its not a big deal but I only realized this after a few tests. In book they give you 3 minutes per each question while the real state exam gives you only 2.4., thats a huge 1 hour difference at final exam. So keep that in mind.....state exam here is 100 question and 4 hours, in this book its 100 questions and says you have 5 hours.
