Estimator's Piping Man-Hour Manual, Fifth Edition (Estimator's Man-Hour Library)

Synopsis

This reference provides reliable piping estimating data including installation of pneumatic mechanical instrumentation used in monitoring various process systems. This new edition has been expanded and updated to include installation of pneumatic mechanical instrumentation, which is used in monitoring various process systems.

Book Information

Series: Estimator's Man-Hour Library

Perfect Paperback: 256 pages

Publisher: Gulf Professional Publishing; 5 edition (June 7, 1999)

Language: English

ISBN-10: 0884152596

ISBN-13: 978-0884152590

Product Dimensions: 6.5 x 0.6 x 10 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 13 customer reviews

Best Sellers Rank: #530,416 in Books (See Top 100 in Books) #66 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Surveying & Photogrammetry #90 in Books > Crafts, Hobbies & Home > Home Improvement & Design > How-to & Home Improvements > Plumbing & Household Automation #294 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Structural

Customer Reviews

John S. Page has wide experience in cost and labor estimating, having worked for some of the largest construction firms in the world. He has made and assembled numerous types of estimates including lump-sum, hard-priced, and scope, and has conducted many time and method studies in the field and in fabricating shops. Mr. Page has a B.S. in civil engineering from the University of Arkansas and received the Award of Merit from the American Association of Cost Engineers in recognition of outstanding service and cost engineering.

The estimating standard all refer to. Could be priced a little lower after all these years though!

This book is a great reference to avoid any guesstimating and to estimate MH's on handling, cutting, beveling, field welding, bolting up accessories. I really recommend this if you are estimating piping

work. It is based on steel material so this is not good for iron pipelines.

Loved it

I have used earlier versions of this book, enjoyed enough to buy the latest version after loaning the other one to a co-worker. I developed a spreadsheet that includes each step or task from handling to testing. Good information. Will buy again if this one doesn't come home, if I let it out. Ron M.

This is a very good book for advanced estimators. If you are trying to get into estimating go with Means. If you want to accurately calculate time to construct a major piping project this will cover you very well.

Excellent information for those estimating pipe fabrication packages; includes many types of metals including stainless steel, chrome and other exotic metals.

Classic estimators' book. The man hours are still valid today.

Straight forward manual, seems easy to use. Well laid out. Quality of the paper and jacket could be better considering the high price.
