In The Light Of Evolution: Essays From The Laboratory And Field

Synopsis

In the Light of Evolution is a collection of essays by leading scientists, and includes essays by science writer Carl Zimmer, historian Janet Browne, and a foreword by journalist David Quammen. As Quammen says in his foreword, the book collects "reports from the field, plainspoken descriptions of lifetime obsessions, hard-earned bits of wisdom, and works in progress, pried loose from some of the most interesting, eminent researchers in evolutionary biology..." It is a book "for readers who are fascinated by evolutionary biology and who desire to understand better the day-by-day, species-by-species, ecosystem-by-ecosystem texture of its practice as a scientific profession." The book is intended for anyone with an interest in evolution, and it can be used in a wide variety of courses, including major's and non-major's introductory biology and evolution classes.

Book Information

Hardcover: 336 pages

Publisher: W. H. Freeman; 2 edition (January 3, 2011)

Language: English

ISBN-10: 0981519490

ISBN-13: 978-0981519494

Product Dimensions: 7.3 x 1 x 10.2 inches

Shipping Weight: 2.4 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 7 customer reviews

Best Sellers Rank: #55,034 in Books (See Top 100 in Books) #12 in Books > Science & Math > Biological Sciences > Biology > Developmental Biology #38 in Books > Science & Math > Essays & Commentary #333 in Books > Science & Math > Evolution

Customer Reviews

"In the Light of Evolution is exactly what both other scientists and the public need in the quest for understanding of this vitally important subject: a dispatch from the front, by scientists directly engaged in research on evolution, accompanied by a leading historian and the most knowledgeable journalists." —Edward O. Wilson, University Professor Emeritus, Harvard University and author of Consilience: The Unity of Knowledge.

Jonathan Losos is Monique and Philip Lehner Professor for the Study of Latin America at Harvard University. He is the recipient of a number of awards, including the Theodosius Dobzhansky Prize

from the Society for the Study of Evolution and the David Starr Jordan Prize from the American Society of Naturalists. He is the author of Lizards in the Evolutionary Tree: Ecology, Evolution, and Adaptive Radiation of Anolis (University of California Press).

From the title, it's pretty clear that this is an assemblage of essays, and there need not be any continuity. However, this just feels that there could really be an introduction and conclusion section to round things out since the essays are at least interconnected enough to merit appearing in the same book.

This book gives the personal side to scientific investigation. Authors describe their thought processes and efforts to develop the experimental method that led to their discoveries. They are timely discoveries.

Well written textbook, using this for my Master of Science program.

The Best book I've read that talks about Darwin.

The best book about evidences for Evolution as a "Scientific Theory" and a Fact!!!!...It is easy and clear to read...I recommend two other Books too:1. EVOLUTION from Futuyma2. Denying Evolution from Massimo Pigliucci These 3 Books are the BEST about Evolution!!!!Kosta SPYROU - Greece

Awesome book with reasonable price. Contents are very interesting if you are interested in evolutionary biology. Losos is great. Awe

On time delivery, product as described
