How To Talk So Little Kids Will Listen: A Survival Guide To Life With Children Ages 2-7

Synopsis

A must-have resource for anyone who lives or works with young kids, with an introduction by Adele Faber, coauthor of the international best-seller *The Boston Globe* dubbed "The Parenting Bible". For over 35 years, parents have turned to *How to Talk So Kids Will Listen & Listen So Kids Will Talk* for its respectful and effective solutions to the unending challenges of raising children. Now, in response to growing demand, Adele's daughter, Joanna Faber, along with Julie King, tailor *How to Talk*'s powerful communication skills to children ages two to seven. Faber and King, each a parenting expert in her own right, share their wisdom accumulated over years of conducting *How To Talk* workshops with parents and a broad variety of professionals. With a lively combination of storytelling, cartoons, and fly-on-the-wall discussions from their workshops, they provide concrete tools and tips that will transform your relationship with the young kids in your life. What do you do with a little kid who...won't brush her teeth...screams in his car seat...pinches the baby...refuses to eat vegetables...runs rampant in the supermarket? Organized according to common challenges and conflicts, this book is an essential emergency first-aid manual of communication strategies, including a chapter that addresses the special needs of children with sensory processing and autism spectrum disorders. This user-friendly guide will empower parents and caregivers to forge rewarding, joyful relationships with terrible two-year-olds, truculent three-year-olds, ferocious four-year-olds, foolhardy five-year-olds, self-centered six-year-olds, and the occasional semi-civilized seven-year-old. And, it will help little kids grow into self-reliant big kids who are cooperative and connected to their parents, teachers, siblings, and peers.

Customer Reviews

Ok, so I've been wanting to write a review for this book since I received it when it first came out but I can't find it in my house. I think that my child took it and is reading it so that he can learn all our tricks. Haha. My child doesn't actually read yet but I am lucky I did before it went missing because it has done no less than change my relationship with him. *How to Talk So Little Kids Will Listen* is full of great, doable advice that is general enough for any situation, but with specific examples so that you know exactly what the authors are trying to explain. The real-life examples could easily have come from my family. For example, the child who wants something that fell into a crack in his car seat and it is inaccessible to him and to me, the driver. Joanna and Julie give great advice on how to respond to difficult situations with little kids that could easily cause a major meltdown. For example, when the thing falls into the crack in the car seat and I can't reach it, in the past my child would start yelling and screaming and then move into a full-on tantrum. I always felt that I had two choices: 1: I could pull over and stop, get out of the car, open the door where his car seat is, and retrieve the thing. That would stop the tantrum before it starts, but it would teach him that he is welcome to have his way whenever he threatens me with a tantrum. Or, 2: I could not get the thing, tell him to live with it for the 10 minutes (or whatever) until we get to where we are going. That response would surely invite crying escalating, into a full-on, inconsolable tantrum as the ride went on. I would have to listen to the screaming for the whole ride and then deal with it when we got to where we are going. Julie and Joanna suggest a great third response: agree with my child that the thing is really important. Tell him that I wish I could reach the car seat to retrieve it. Then really get dramatic with it: talk about having a button on the dashboard that I could just push and a hundred of those things would magically appear! And then ask what we could do with a hundred of those things, until my child is so caught up in the fantasy that he has forgotten how much he wants the thing and we get to where we are going safe, sound, and happy. I've actually had to do this a number of times since reading the book. My child's response still amazes me every time! It sounds like magic, but it's not. It is a way of listening to your child and validating his/her experience. *How to Talk So Little Kids Will Listen* gives lots of ideas, stories and examples of how to do this in any number of difficult situations. I do want to be clear, this isn't magic, and sometimes even the best skills don't produce sunny results. But more often than not, as a result of the skills I was able to pick up from

this book, I can at least head off tantrums and other bad behavior before it starts, even if my child isn't at all smiles.

I've only gotten 2 chapters in and find this book extremely effective and helpful with parenting tips. The strategies I've implemented so far have worked very well with my 2 and 5 year old. Highly recommend reading this!

SO helpful for letting little kids know that you care yet guiding them at the same time.

Really great info. And when I don't get triggered, and use these tools, they typically work.

A must have! Love this book! Will buy the one for bigger kids later

Excellent advice with very specific examples delivered while commuting home from work. The voices got a bit annoying at times, but takeaways worth it.

great tips!

GREAT book!
