Customer Reviews

Learn How to Quickly Solve Difficult CEN Test Questions Here's a little "secret" about the Certified Emergency Nurse (CEN) Examination: the CEN test is what we in the test preparation field call a "content driven" test. While some tests are looking to see what you are ABLE to learn, the purpose of the Certification Examination for Emergency Nurses, offered by the Board of Certification for Emergency Nursing (BCEN), is to test your understanding of what you have already learned. The goal of the CEN test is to use a standardized testing process to create an objective assessment of a test taker's knowledge and skills. In other words, it's more about what you know than your ability to solve clever puzzles. This is good news for those who are serious about being prepared, because it boils down to a very simple strategy: You can succeed on the CEN test and become a Certified Emergency Nurse (CEN) by learning critical concepts on the test so that you are prepared for as many questions as possible. Repetition and thorough preparation is a process that rewards those who are serious about being prepared, which means that succeeding on the CEN test is within the reach of virtually anyone interested in learning the material. This is great news! It means that if you've been worried about your upcoming CEN test, you can rest easy IF you have a good strategy for knowing what to study and how to effectively use repetition to your advantage. But it also creates another set of problems. If you tried to memorize every single possible thing you can for the CEN test, the field of possible things to review would be so huge that you could not hope to cover everything in a reasonable time. That's why we created the CEN Exam Flashcard Study System: we have taken all of the possible topics and reduced them down to the hundreds of concepts you must know and provided an easy-to-use learning method to guarantee success on the CEN test. We wanted this system to be simple, effective, and fast so that you can succeed on your CEN test with a minimum amount of time spent preparing for it. --Here Are Some of the Features of Our CEN

Exam Flashcard Study System

Study after study has shown that repetition is the most effective form of learning- and nothing beats flashcards when it comes to making repetitive learning fun and fast. Flashcards engage more of your senses in the learning process- you "compete" with yourself to see if you know the answers to the questions, and the flipping action gets you actively involved in the learning process. Our cards are printed on heavy, bright white 67 lb. cover stock, and are laser printed at 1200 dpi on our industrial printers- these are professional-quality cards that will not smear or wear out with heavy usage. We cover the major content areas on the exam. Our flashcards include an edge that is micro-perforated, which means that you are much less likely to have a painful papercut on your fingers when moving quickly through the cards. Our cards are portable, making it easy for you to grab a few and study while waiting for the bus or the doctor, or anywhere where you have a spare moment that would otherwise be wasted. Our CEN test cards are written in an easy to understand, straightforward style - we don't include any more technical jargon than what you need to pass the test. The cards are a generous size- 3.67 x 4.25 inches- they fit perfectly in your hands and they aren't so small that you have to use a magnifying glass to read tiny type- all questions and answers are in a normal-size print for easy studying. Our concept cards include in-depth explanations- you won't see any "one word" answers on our cards that require you to go get a textbook to understand why your answer was wrong- all of our cards include generous, thorough explanations so you not only get it right or wrong- but you also know why! We use a font created by Microsoft to make reading easier- this will enable you to absorb more information painlessly during late night study sessions. Our system enables you to study in small, digestible bits of information- unlike using boring textbooks, flashcards turn learning into a "game" you can play until you've mastered the material. It's easy for a friend to help you study- they don't even have to know anything about the CEN test- if they can read, then they can quiz you with our flashcards! Now, let us explain what the CEN Exam Flashcard Study System is not. It is not a comprehensive review of your education, as there's no way we could fit that onto a single set of flashcards. Don't get us wrong: we're not saying that memorization alone will automatically result in a passing CEN test score- you have to have the ability to apply it as well. However, without the foundation of the core concepts, you cannot possibly hope to apply the information. After all, you can't apply what you don't know. CEN Exam Flashcard Study System is a compilation of the hundreds of critical concepts you must understand to pass the CEN test. Nothing more, nothing less. --If you think there's even the smallest chance that these flashcards will help you, you owe it to yourself to try them out. Don't let fear or doubt stand in the way of your opportunity to achieve the test score you need to fulfill your dreams.

I received my CEN Flashcards promptly in the mail after ordering, in fact, sooner than predicted. I have had time to review the cards, along with the accompanying supplemental materials. The cards are excellent, and are a high quality paper, thick enough for repeated use and filing in an index card box. The content is only on one side of the card, which I appreciate. There are over 450 cards each representing individual content within a generalized content group, neurological, cardiovascular, patient care management, and on. The most value of these cards is each card, although thorough in detail and explanation, are perfect for attention span of a busy working nurse. That is, you can study one or two cards, go about your day, and then study another. The material is concise, specific, and easily managed due to its flashcard presentation. There is also the added bonus of room on each card, front and back, for note taking, or writing a definition, or additional information I feel I need. I find; however, not to take any additional notes, until the entire section, as example, neurology, is completed, because the material is so comprehensive, any additional note taking from other resources is probably covered on another card in the organized study group. Included with the Flashcard system is an abundance of other materials, study guides, excellent review tests exceeding the length of the CEN, and more. These materials alone are worth the cost of the study system. I researched many materials on the internet. I found these cards are published this year, making their content current. Other materials, although well known, with good reviews, are from the 1990s, and thus outdated. I would note the cards are not for the novice nurse. A general background and few years in nursing are desirable to understand the content. J Geary
RNjeanette_joy_ri@yahoo.com

The information on the cards are great. Easy to study. However, they are made of flimsy constitution paper, and come in a perforated 8 1/2" x 11 sheet. You have to tear each one apart. I also spent another \$35 to laminate them, not to mention the hours it took to do the laminating. All said and done, it got a little pricey to make these cards something that would stand up to a good amount of use.

I kind of expected more quiz like questions/multiple choice. These are very in depth questions and in depth rational! Not what I expected but still a great tool! I love them

These are NOT flash cards. These are perforated pages. They look cheap and fragile. For the price I paid I truly expected a higher quality of product. I was actually looking for a heavy yardstick with a

colorful glossy finish. When they clearly skimmed on the quality of the physical product it raises concerns in my head about the quality of research and knowledge that went into the information. Very disappointed.

I love how easy it is to grab a handful of cards and take them with you. You can study them at work while on a break or at a restaurant while eating dinner. The content is fantastic and seems to cover everything that is pertinent for the CEN exam. I have used the flash card method in the past for other exams and feel confident that it help me again this time. The reason I didn't give a 5 out 5 is because you do have take time to tear the sheets of paper contain the cards apart.

So far, I am impressed with the system. The flashcards are convenient and help with repetition and retention. The only input I may have is maybe putting pictures (for those that need visuals to understand concepts like aneurysms) to make it a little less wordy. Other than that, I highly recommend this product to anyone wanting to pass the exam.

Thin paper, tiny script, difficult to see and read. Really, really unhappy with them but need them now so am not sending them back. Waste of money. Should be on heavier paper, laminated for the cost of them. You even have to tear the cards apart. Not sure about the content because I just got them but they are going to be hard to learn from because they way they are set up. Again, sorry I spent the money for them. Could have printed stuff off the computer and cut them up myself to study from, that's how bad these are. Nurses, don't waste your money.

This product has saved me so much time since I LOVE making note cards to study from. They always seem way more efficient for me, and these cards are packing with great information. Thank you for helping me in my studies to becoming a CEN nurse!
