The Mango: Botany, Production And Uses (Cabi)

Synopsis

The Mango is one of the oldest cultivated fruit crops, having been grown in India for at least 4000 years. Mango is the most important fruit crop of Asia and its annual production is exceeded worldwide only by Musa, citrus, grapes and apples. The last decade has seen a rapid growth of mango production, mainly due to expansion into new growing regions but also to the adoption of modern field practices and cultivars. A wide range of fresh, mango cultivars are now consumed worldwide and are available year round. The Mango: Botany, Production and Uses, published in 1997, represented the first comprehensive examination of all aspects of modern mango production and research. Developing upon the successful first edition, this book incorporates a discussion of significant advances in mango research that have contributed to improved production and will be highly relevant for researchers and growers alike.

Book Information

Series: Cabi

Hardcover: 696 pages

Publisher: CABI; 2 edition (April 30, 2009)

Language: English

ISBN-10: 184593489X

ISBN-13: 978-1845934897

Product Dimensions: 9.7 x 1.8 x 6.5 inches

Shipping Weight: 3.8 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #2,576,422 in Books (See Top 100 in Books) #36 in Books > Science & Math > Agricultural Sciences > Tropical Agriculture #483 in Books > Science & Math > Agricultural Sciences > Crop Science #910 in Books > Science & Math > Agricultural Sciences > Horticulture

Customer Reviews

"This second edition will be the definitive English language work on the crop for the foreseeable future, invaluable to growers, researchers, students and investors in the crop alike." (Rob Lockwood)

Richard E. Litz

A must have reference book for anyone growing mango's. A compilation from researchers around

the globe that can help answer most questions.
