Amaze and Confound Friends Instantly Baffle Brains for Fun! Blow Minds Beyond Explanation Trick Your Way to Mental Superpowers THE PERFORMANCEYour friend will name a random number. You grab your pen and rapidly write out 16 numbers into a 4x4 grid. With a smug flourish, you then reveal that all combinations and directions within the grid add up to their chosen number. Each vertical column adds up to their number. Each horizontal line adds up to their number. Each block of 4 adds up. Each opposite pair adds up. Each diagonal adds up. And even the 4 corners add up - all to their chosen number. You appear to have performed thousands of calculations, in your head in mere seconds, producing a Magic Square of exquisite mathematical elegance. It is simply mind-blowing.MIND-BLOWINGEffortlessly perform a trick that it seems only a computer could perform, and learn how in 10 minutes from right now.99.99% of people won't even come close to solving this. The most plausible explanation is, quite simply, that you're a genuine Hidden Genius...

In just a few short pages, Lewis explains how to easily perform a seemingly difficult feat of mind power. The basic concept has been around for a bit but it's not as easy to find as it once was. The basic routine could be done as part of an impromptu, close-up act or incorporated as an opener to a full-evening's mentalist's show. The method is solid, not difficult and adaptable. Smile also offers a few tips on how to perform the routine that may be helpful. The Magic Square isn't performed too often so for many, this will appear to be a brand-new, never-seen-before presentation. I think if this was incorporated into a blindfold act, the effect on an audience would be very strong.

Simple but very effective, this classic trick will have your friends and family amazed at your magic powers! I tried it for some slightly inebriated pals at a party, and they thought it was incredible - mwah hwah hwah!

Book is as described. Very easy to learn. Didn't even take ten minutes. My nieces and nephew will love this trick. Highly recommend this book.

Yes, it's a simple trick. Yes, it's a very short book. Yes, Smile is pretty ballsy to charge three bucks for a mere thirty pages. Yes, you could find the same trick and more variations for free on the internet. But the real value here is in Smile's presentation. His writing voice is hilarious and engaging, constantly teasing and tantalizing, pulling the reader through the learning process with the exact kind of P.T Barnum-y, cocktail party, cheap charlatan, wiseguy personality that will make your own delivery of the trick so effective in a mixed group.

I love doing magic tricks to impress my friends and new acquaintances. For a long time I used to carry a deck of cards with me wherever I went but this is a trick you can do with just a pen and a piece of paper. I can't wait to try it out.

It was so simple to learn that I (this guy

This is more of a pamphlet than a book. It strikes me as being similar to the small pieces Sherlock Holmes would reference. " just finished my monograph on the preferred shoe lace knotting techniques of East Indian sailors, my dear Watson". A well written, instructional treatise on one rather obscure topic. It works perfectly, is well worth twice the price and should be treated with the respect that a weightier tome would gather. It is small in stature, but like all the best illusions, stunts and acts, packs flat, Plays Big, buy it now.

Wonderful, Mind boggling, easy to learn!!
