Super Science: Matter Matters!

Synopsis

It's pop-up chemistry chaos in this novelty-packed exploration of the science of matter. This new science series is a breath of fresh air, explaining key elements of science in a fun, straightforward way. The engaging, lighthearted text is perfectly complemented by the humorous, comic-book style illustrations. Explore atoms, molecules, reactions, elements, radioactivity and other aspects of chemistry with interactive novelties and fun experiment suggestions on every spread.

Book Information

Series: Super Science

Hardcover: 18 pages

Publisher: Templar; Nov Pop edition (August 14, 2012)

Language: English

ISBN-10: 0763660965

ISBN-13: 978-0763660963

Product Dimensions: 11.2 x 1 x 10.3 inches

Customer Reviews

Tom Adams is a TV producer with fifteen years of program-making experience, specializing in science and history documentaries for the Discovery Channel, History Channel, BBC, and Channel 4. He is a member of the Association of British Science Writers. His first children's book was, *Feel the Force!* was the opening title in the Super Science series. Thomas Flintham studied illustration at the Camberwell College of Art. The Super Science series is Thomas's first nonfiction project, where his funky, cartoony illustrations bring the subjects to life. He lives in London.

This is actually a little "old" for my seven year old daughter but she still loves to leaf through this to

see the pictures and pull-outs. When I read it I try to relate it to her using personal examples. I'm hoping it will make her more excited about science and she will eventually think what the book states is cool too. ;)

Great book for high engagement and thinking!

The book was a Christmas present for my grand-daughter. She loves it - especially the pop-outs. The suggestions came from one of her teachers as an extra gift. So glad we ordered the book.

Awesome science! This book is the best! My daughter just loves it. Educational in a very fun way! A +++

Every page is full of great chemistry. I usually find chemistry overwhelming & difficult to follow. This book makes it so easy. I homeschool & it's perfect for my kids ages 5 & 6. They wouldn't get these advanced concepts without the great illustrations & practical methods used in this book. Totally superb! I'm 44 & able to retain what I've taught them. It's a great book for all ages.

This is a great book. My kids loved it and were very engaged.

Super fun and full of information!
